Install the Network Camera in Ethernet network

1. If external devices such as sensors and alarms are available, make connection to the I/O terminal block.
*Refer to the user's manual for the I/O voltages.

2. Use an Ethernet cable to make connection from the Ethernet port to the hub.
*Use a Category 5 cross cable when the Network Camera is directly connected to a PC.

3. Finally, connect the power cord to a power outlet.

4 Assign IP address

1. Run the "Installation Wizard" under "Utility" directory on the software CD.
2. The program will search Vivotek Video Servers or Network Cameras on the same LAN.

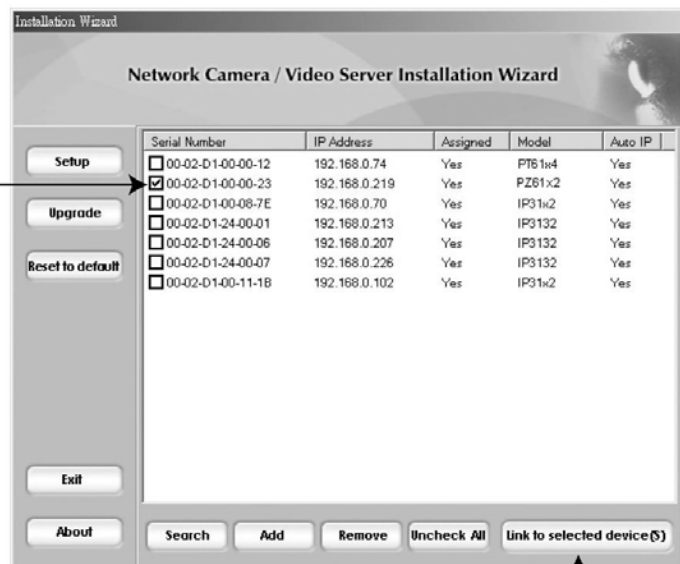

3. After searching, the main installer window will pop up. Click on the serial number that matches the one you just noted from

2 Physical description

4. Click "Link to selected device(s)" to connect the Internet Explorer to the Network Camera.

* If there is no DHCP server on the LAN, please refer to the user's manual for the methods of assigning an IP address.
