#### ☑ **VIVOTEK Receives the Award of "Outstanding IT Applications/ Products Awards" of ITMonth 2006**

VIVOTEK announced today that its 3GPP-compatible pan/tilt network camera ☑ PT7135/7137 has won the big prize of "Outstanding IT Applications/ Products Awards" of ITMonth 2006, Taipei, awarded by Ministry of Economic Affairs, R.O.C..

The VIVOTEK 3GPP-compatible PT7135/7137 network camera allows users not only to receive the optimized, synchronized up to 30fps, VGA. video and audio by the standard web browser or application software, but also 3G cellular phones or any RTSP (Real Time Streaming Protocol) compatible media device anytime, anywhere. Users can directly employ the built-in RTSP-compatible multimedia software on 3G cellular phones to view the streaming video from the camera site without extra works on downloading and installing additional software. With efficient MPEG-4 compression, a variety of applications where available bandwidth is restricted but higher frame rates are required can be implemented and developed with ease. The wide pan/tilt movement, controlled by the application, enables you to locate any position in the viewable area within seconds.

"Having PT7135/PT7137 chosen as the Outstanding IT Applications/ Products is a great honor and a reflection of our determination to bring the best IP surveillance solutions to the market," said Owen Chen, Chairman of VIVOTEK. "It has been our long-standing goal to deliver solutions that will enable the mass market to enter the safer, more convenient world by IP surveillance. So the launch of PT7135/PT7137 provides non tech-savvy users to be able to quickly and easily establish their home security. With the consecutive winning of the highly prestigious awards in those two months, obviously, it has proven once again that VIVOTEK's products in terms of quality, performance, and cost are absolutely your best choice.

#### ☑ **Successful Trade Shows at China International Exhibition**

Thank you for dropping by our traveling exhibits in China from 10/30 to 11/2, giving us lots of precious feedbacks and recommendations. At this show, hundreds of buyers or customers are still searching for the 3GPP/ISMA or Megapixel network camera solution for home or SOHO security. So, the birth of our 3GPP 7000 series -- IP7135/IP7137/PT7135/PT7137 or going-to-be-launched IP7131/IP7138 is completely a right-time product, meeting this upward trend and offering a very cost-effective solution. We are all convinced that more and more 3G-oriented applications will incorporate with the IP network cameras for the next few years to bring much more benefits to end users and facilitate our future lives.

### -Product News-

#### **VIVOTEK's 3G-compatible Pan/Tilt Network Camera -- PT7135/7137**

#### **Features:**

- Live Video and Audio Monitor via 2.5G/3G Mobile Phone or Media Adapter
- Motorized Wide-range Pan/Tilt
- MPEG-4 Video Compression (Simple Profile)
- Up to 30 Frames Per Second in Full VGA Resolution
- Easy to Install and Configure
- Optimized Synchronization of Audio and Video
- 802.11g Wireless Connection (PT7137)
- Supports 3GPP/ISMA RTSP (Real Time Streaming Protocol)
- Intelligent Motion Detection, with Pre- and Post- Alarm Snapshots
- Superior Low Light Performance
- Free-bundled 16-CH Audio and Video Recording Software

### -Firmware Updates-

- IP7135 network camera ☑ V.0201g
- IP7137 network camera ☑ V. 0201j
- PZ61X2 network camera - V. 0103c
